OUTCOME OF MEDICOZ CREATIVITY

SOMETHING QUOTED

The most important thing is to try and inspire people so that they can be great in whatever they want to do. - Kobe Bryant

Our College - Known to Unknown (Editors Choice)

Ahmedabad school was started in 1871. It was affiliated to the then Civil Hospital which was located at Ghee Kanta Road.It had 14 students in its first batch for Hospital Assistant training. A donation of Rs.20,000 /- by Sir Byramjee Jeejeebhoy CSI (1822--1890) in 1879 changed the course of events, and this Ahmedabad Medical School now came to be known as B.J.Medical School in commemoration of the donor from 16th of June 1879. Since then, the development of this medical school has been phenomenal. In 1917, it got affiliated with College of Physician and Surgeons of Bombay offering Diploma of LCPS. In 1946,B.J.Medical School became B.J.Medical College as was recognized by Mombay University for M.B.B.S course with the admission of first batch of 50 students in 1st M.B.B.S. It became affiliated to Gujarat University in the year 1951. With the establishment of New Civil Hospital in 1952, B.J. Medical College shifted to its present day building. It has since acquired its present-day form.

The B.J.Medical College, affiliated to the largest hospital in Asia (Civil Hospital), offers M.B.B.S course, post-graduate courses in various branches – diploma, degree and super speciality It happens to be the recognized centre for National Board of Medical Examinations for varius speciality subjects and its interactions with Indian Council of Medical Research for various health and research projects are extensive. The World Health Organization (W.H.O.) has recognized the college for its integrated teaching and training programme on child health services and universal immunization. It is also a recognized centre for distance education courses run by Indira Gandhi Open University(IGNOU) like Hospital Management, Geriatrics, etc.

Currently, the B.J.Medical College admits 250 students per annum to its undergraduate course and equal number of students per annum for its postgraduate degree and diploma courses.

The logo of our college has its own meaning. It is divided into four quadrants. In the top left is the Cock of Gujarat. The Cock as a sign of imperial banner of Gujarat appeared in the time of Bhimdev-I.Shidharaj Jaysinh raised that banner high and mighty, the flag of Gujarat was called. In the bottom right is the Serpent intertwined on a dagger of the Aesculapius. As Aesculapius was an order of monks in ancient Greece. Sufferers from every part of the then known world came to the temple of a Aesculapius for a treatment in what can now be quated with naturopathy. The intertwined serpent on the dagger of the temple goddess has since then symbolized western medicine. In the top right and bottom left are thirteen lines, each representing thirteen canons of the International Medical Ethics.

Above and below of these quadrants are phares in Sanskrit(Anvisyami khalu nirmasyami vaa panthanum) and Latin(Aut viam inveniam aut faciam) respectively. It means "Shall find or Create a Path". This phrase inspires disciples to search for the true meaning of thier study in health sciences and to innovate for excellence in this profession

Surbhi Nayak (3rd/1st MBBS)

Getting the USA visa was in itself kind of an achievement for me..especially after facing the rejection first time. This one month vacation was indeed a much needed break from the monotonous routine of prefinal year. And obviously the added advantage was of a major escape from the scorching heat of Ahmedabad.

From the moment I entered Boston, I was totally amazed with the beauty, the antique architecture and discipline of that city. The lively people, variety of food joints there and the river Charles added to the charm. Boston also has some of the important historical landmarks-the freedom trail, place of Boston Massacre, the holocaust and many more.......We took the Boston Duck tour which was an interesting ride covering the famous tourist attractions of city. The unique feature of this ride was the streamline shaped bus which later on went into the Charles river. Charles river surrounds the Boston and separates it from Cambridge. Cambridge houses the two top universities of United states, Harvard and MIT. Huge campuses and spectacular buildings characterised these universities. We also visited Cliffwalk, which was basically a 5.6 km long walk along the ocean in Rhode island. With the stunning scenic beauty, the place was very refreshing despite of the chilling weather. New York, as expected is a very busy city with overloaded roads covered on both sides by huge high rise buildings. Times square, a madly populated and exciting place, is the centre of attraction for the visitors. Statue of Liberty, situated on the Liberty island, listed among the top wonders of the world Is actually a fabulous place to visit. Situated in the Upper New York Bay, top of the statue gives an amazing view of Manhattan Of New york city, skyline of New Jersey city and the Brookline bridge. Madam Tussads museum at Times square was another fun filled and thrilling place to visit where visitors could capture a fun moment with the quite resembling wax statues of big celebrities. At night, the view from the 86th floor of Empire States building, of the whole New york City, full lighted up, was magnificent. Battery Park and Wall Street were other worth visiting places in New york.

Philadelphia, another big city of the East coast is a pleasing city which is also home to one of the IV league Universities-University of Pennsylvania, another one with a beautiful and huge campus.

USA, its people and its places, were overall really impressive. There are a lot many things we can easily learn from the lifestyle there, just to make our own lives bit more simpler. And most important how to enjoy life to the fullest...!!

Learning Life Priyal patel (2nd /2 nd mbbs)

O' tell me what is life? Who teachth it to me? Do those the mighty mountains or the birds that flee? Is it the endless sky or the running river Oh i learn life even from cube and mirror Trust as the god did learn

How jumbled is the cube, in hopes to get rearranged in order, So are we supposed to learn to never loose hope even after crossing the border.

And there is that mirror showing us the mighty truth. So are we supposed to behave with our group. Doesn't that cube roll round and round to fix itself, Shouldn't we take the toil till all our brains boil. There is that stupid mirror into pieces due to its action of showering bitter facts,

No, i wouldn't deny that you should be ready for results of your facts. How unfailingly does that cube lures everyone. It is that way we have to take in people so that good works can be

And there is that mirror to whom everyone show off, So should we develop ourselves to command respect and not demand Doesn't that cube have all that shades varying like dice. And in the same we have this life where variety is the spice. And there is that mirror that holds everyone's secret desires, And so should be we never revealing others leading their life on fire. Yes i learn life from even a tube and child's shiver Yes, i learn life from even a cube and a mirror

Movie: Jurassic World By: Shivam Panchal(2 nd/2nd MBBS)

The dinosaurs return to the big screen - properly - after a long wait. Picking up from nearly 20 years after the trilogy - and quite disconnected from it - we see Jurassic World, a theme park featuring live dinosaurs, up and running on Isla Nublar. However, it's slowly losing revenue, to bolster which, the park's team, led by Claire (Bryce Dallas Howard) creates a hybrid species of dinosaur - which escapes and wreaks havoc. Also involved in the mix are her nephews, Zach & Gary Whitehall - who've just popped by to have a fun weekend - and Owen Grady (Chris Pratt), who looks after four Velociraptors and shares a special bond with them.Irrfan Khan stars as Simon Masrani, current head of InGen, which - like every other big movie corporation - has a secret agenda. Their tales intertwine with many twists and turns which will, to say the least, keep you hooked, along with decent special effects. The premise may seem a bit derivative at times, but the overall feel is highly satisfying. Do watch it - preferably in 3D.

Prashaman entering in 5th year of publication...here is photo of editorial team of prashaman who worked Sincerely for the year 2014 and 2015

Face 2 Face

Maggi is more than just instant 2 minute noodles. It's the agglomeration of memories whether they be 2 am snacks or a hot delicious recluse on a rainy day. Not to mention it's almost a lifeline for college goers and hostel residents alike. Prashaman asked our students about their feelings regarding the nation wide ban on this yellow packets of happiness.

Vasav Nakshiwala (3/1st) - Maggi has it's own unique taste and has always been yummy. It is the only thing and the first food item that I could cook myself...I remember it as a great companion while watching movies with my friends during vacations.. Food inspection is doing better job recently and astonishing findings about contents of Maggi are worth, yet, we are sort of dependant on maggi... I hope in future we get its better alternative.

Salika Gadiwala (3/1st) - Maggie is known and loved by all, be it kids or elders. I have been eating it since my childhood, but I became a fan of it after coming to hostel. Be it tasteless mess food or disliked tiffin food, be it fun and gossip time or birthday bashes, universal saviour, maggie is all available at our service. People not knowing to cook food can also flaunt about their ability to cook Maggie. The ban placed on Maggie, due to its contents harming brain, symbolises "prevention is better than cure " for coming generations. But for us, who have grown up with maggie, we will miss it a lot!

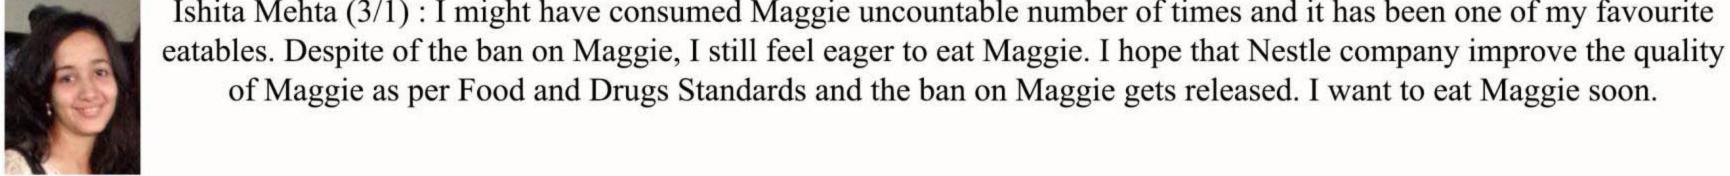

Komal Ghataliya (3/1st): Maggie, the 2 minute noodles, has always been the answer whenever I am too hungry to

Ishita Mehta (3/1): I might have consumed Maggie uncountable number of times and it has been one of my favourite

of Maggie as per Food and Drugs Standards and the ban on Maggie gets released. I want to eat Maggie soon.

wait for getting to eat something. Everyone, like me, who has had a hostel life, would agree to the fact that maggie is like the most quick, useful, tasty source of overcoming their hunger. Reliability on maggie is questionable because of the reports, but since the ban, I miss Maggie too much!

Srashti shah (2/2nd): I used to eat a lot of Maggi like minimum 3 times a week. It used to be my sole support and savior whenever there was disliked food in the mess. It never left me hungry. Since its ban, I have spent many nights

and day with an empty stomach... My last and only wish now is that this ban is removed. And if thats not possible I request Nestle to send the remaining maggi stock to our hostels... Its a big necessity here.

-Farhad mansuri (2/2nd): Maggi..yummy and tummy filler for me before some days but after this drastic news i am shocked! How they could cheat people like this! I mean before buying any food product everyone has some kind of trust on that product& company. To break trust of huge crowd & to serve them such a poisonous material is really very bad! Nowonwards i might think several times before eating any food product.
